## **KALIBURN**

# KALIBURN ProLine 2200 200 amp High Current Density Plasma Cutting System

The ProLine 2200 is a full function, precision, high current density 200 amp plasma system that combines precise, square, and virtually dross-free cuts with excellent speeds. If you are facing a high quality, heavy-duty job without a heavy-duty budget, the ProLine 2200 is your answer. The system offers all of the benefits of precision, high current density plasma at a fraction of the cost of other systems.

The ProLine 2200 is capable of production cutting gauge thicknesses through 1  $\frac{1}{4}$ " (32.0mm) thick with a maximum capacity of 2" (50.0mm).

The ProLine 2200 is equipped with manual controls so that you can tailor all of the cutting parameters to your specifications. Optionally, our patented INOVA torch height control system can be built into the ProLine 2200, greatly simplifying installation.

If you are looking for precision, high current density plasma process technology at a price comparable to conventional plasma, the decision to purchase a ProLine 2200 plasma system from KALIBURN is truly a "no-brainer"!

Mild Steel	Max. Thickness
Production Capacity	(Edge Start, with dross)
1-1/4" (32.0mm)	2" (50.0mm)

The ProLine 2200 is one of the three systems in the KALIBURN "ProLine" family. The ProLine 2150 and ProLine 2260 offer identical cut quality but each has a unique amperage range and corresponding thickness capacity. KALIBURN also offers four fully automated machines in the "Spirit" family; Spirit150a, Spirit200a, Spirit275a and Spirit400a. These machines are our most advanced systems and provide cut quality identical to the ProLine systems. With Spirit systems, all process parameters are set automatically for ease of operation.

3-YEAR POWER SUPPLY WARRANTY

Engineered for life

### **SPECIFICATIONS**

RATED 200 amps DC @ 100% duty cycle (@ 104° F / 40° C								
3 PHASE INPUT VOLTAGE & AMPERAGE								
208V	60Hz	115A						
230V	60Hz	104A						
380V	50/60Hz	63A						
415V	50/60Hz	58A

#### **FEATURES**

- High current density cuts are virtually dross free and square ( 2° or less bevel)
- 🕅 🔐 and 🄀 approval available
- 600 ampere IGBT chopper transistor for high reliability
- Fast switch transferred arc for extended nozzle life
- Advanced technology, high efficiency chopper-stabilized current output
- 70 GPH recirculating torch coolant system
- Current overshoot reduction circuitry for longer electrode and nozzle life
- Very low transferred arc current sensing for higher starting height and longer nozzle shield life
- Extends electrode life through a patented process
- Marking capability
- Optional INOVA's control electronics are housed in the manual gas console atop the power supply

#### **OPTIONAL**

The ProLine 2200 is available with the industry standard INOVA Torch Height Control system. In this configuration the control electronics are housed in the manual gas console atop the power supply. Also, a pneumatic safety switch can be added to protect the torch from collision damage.
